Introduction

The Essence Numerology Chart takes Numerology to the next level by allowing the process of self-acceptance and self-advocacy to begin to heal your mind and heart. What makes this Essence Chart so unique is the healing strategy that has been designed and programmed into the chart. The purpose of this chart then is simply to provide you with valuable information not ordinarily found about your life anywhere else including a holistic look at your entire life. Having the ability to view your experiences and then having the opportunity to look five years into the future definitely has its advantages in helping you to build and maintain a lifetime of good choices, right decisions, and prosperous experiences because you will have advance notice of the type of vibrational patterns you will be attracting each year.

The information found in this chart is an accurate, in-depth, and far-reaching look at what you are working through inwardly (emotionally, intellectually and physically) year-by-year, and is a combination of your Essence, Personal Year, and Universal Year numbers. These three number combinations represent the differing physical, mental and spiritual elements that influence each year of your life, tracking you from Age "1" to your "Current Age" plus "5" Years into the future.

Understanding Your Essence Chart

Your Essence chart is laid out by your age range in 20-year increments, starting from your birth year. The "Essence" number indicates what you are emotionally working through year-by-year. The "Personal" Year is what you are attracting on a physical level and the potential experiences you will attract for that year. Both the Essence and Personal Year numbers are personal to you and are valid from birthday-to-birthday.

Personal Years always begin on your birthday. If your birthday occurs in the second half of the calendar year, between July 1 through December 31, then you would actually fall under the next year's vibrational pattern. The vibrational pull from birthdays in the last half of the year are magnetic and therefore, automatically pull you towards the following year's vibration. Our computer program takes this calculation into consideration so the Personal Years indicated in your chart are correctly stated for each year and for those birthdays in the later half of the year.

Universal Years are not personal to you like the Essence and Personal Years are. They represent the calendar years and are calculated in 9-year cycles, repeating years 1 through 9 over and over again throughout your life span.

When you read your Essence Chart, you will look at the Essence, Personal, and Universal Year numbers together for a particular year to see what the three vibrational patterns will bring you, year-by-year. A general full written explanation has been provided for all of the possible number variations that "could" be calculated for the Essence, Personal, and Universal Year numbers found in your Essence Chart. It's the combination of all three numbers shown

www.NumbersRU.com

*Numbers R U*SM

in your personalized chart by year that paints the entire picture of what experiences you will attract for the entire year.

Numbers in Your Essence Chart

The numbers in your chart will either calculate to be a single-digit number (1, 2, 3, 4, 5, 6, 7, 8, 9) or they will calculate to be a "compound" or three digit number.

All the numbers have very specific meanings; however, the following compound numbers, 19/1, 11/2, 13/4, 22/4, 14/5, 23/5, 16/7 or 18/9, all have more of an influence over your life's experiences than the single-digit numbers due to the multiple vibrational patterns. Ideally, if you had a better understanding of what these numbers together represent and how well they work together or not—either positively or negatively—you could prepare for the experiences that come with each compound number. Balancing the combination of these three numbers is key because they are joined at the hip, so to speak, so you have to be a team player to work within this combination or you will fall too far to the left, middle or right of what each frequency reveals. For example, a #16/7 is known as a karmic lesson. During this period, lessons will be learned and completed. The #1 represents leadership and creativity, the #6 devotion to family, and #7, the intellect who seeks knowledge for the purpose of teaching who requires alone time. The combination of all three characteristics can cause friction if the individual was not aware of how to balance the magnetic pulls that come from each number.

The purpose of the Essence chart is to bring insight, clarity, understanding and acceptance from your life's experiences on a holistic level; where you have been, where you currently are, and what lies ahead of for you in the next five years.

The Essence Numerology Chart is generated from your name, birthdate, and calendar Universal Years and is unique only to your personalized information. Following the Essence Chart you will find the full explanations for each of the Essence, Personal Year and Universal Year numbers; however, only the numbers shown in your Essence Chart pertain to you.

Essence Numbers

The Essence foretells the setting, the nature, and the duration of the inner experiences that you must work through to attain the spiritual growth and awareness that this journey through life demands. These are the physical, mental, and spiritual elements that influence you during a particular year of your life and are the summation of the numerical vibrations of your total name. The Essence, the obligations of the Personal Year, and the Universal Year together form the scenario for the challenges you must work through. The Universal Year indicates how the affairs of the world tend to influence the attitude of mankind. Your Essence number represents a stage in your personal growth and reveals what you are ready to attract and integrate into your life. The combination of your Essence, Personal, and Universal Years should really be considered together to complete the total picture.

Personal Year Numbers

Your Personal Years are one of the most important tools in understanding and preparing for the true nature of events you are to experience during that year. The Personal Year clearly defines what can be expected, what to avoid, and the nature of your personal affairs to be experienced. This knowledge should be used in conjunction with that of the Birthdate numbers, and the Universal Years to show the correlation of all the events and responsibilities that exist between these factors.

The Personal Years begin on your birthdate. If the birthdate falls in the last part of the calendar year (July 1 through December 31), then the Personal Year comes under the vibration of the “following” year, even though the individual will have felt the strong vibrational pull months prior to the birthdate. It is easier to flow with the steam of life once you know what to expect on a yearly basis. Knowing what the year will bring adds joy and excitement to life. It also enhances the ability to live in grace rather than suffer from the pangs of resistance and fear that uncertainty often brings.

Your #1 Personal Year

The #1 Personal Year is getting ready for major changes as you are at a crossroad in your life and need to stay on target. Making new plans and taking action are the keynotes of #1 Personal Year for it marks the beginning of a new nine-year cycle. What you set in motion this year creates the foundation for the rest of the nine-year cycle. How hard you work, and the kind of foundation you build, will follow you throughout this cycle. This requires persistence and courage on your part since the next nine years will depend a great deal upon what you do now. This is the time to make all necessary changes for your future success and to decide exactly what you want out of life. Be aware that there may be some emotional turmoil in the first few months while you are in the thrust of making changes. As you move into the second half of the year you should see the decisions you’ve made materialize, and by the end of the year you will see the fruits of your labors begin to take place.

The #2 Personal Year is the year that tact, diplomacy, and cooperation will bring you your greatest success and reward. It also requires a delicate sense of balance, and a willingness to go around obstacles, without losing sight of your goals. The right and successful use of this power can be used to form various foundations to benefit mankind.

Your #22/4 Personal Year (Master Number)

The #22/4 is a Master number and is a vibration where nervous energy is magnified. Because this is a Master number, as opposed to this being the root #4, the intensity of this year is greatly enhanced or elevated because of the vibration. The “twos” bring increased emotion and sensitivity to this vibration while the root #4 emphasizes detail, hard work, discipline, and foundation. Concentrate on taking time to get your affairs in order during this vibration.

This is not a time for social activities nor is it a year to reach goals on a material level.

Your metaphysical interests will expand your awareness of things beyond third dimensional reality. The desire to be alone to escape from normal pressures of life may prevail. Take advantage of this time to build up your health and improve your mind. You are actually laying the foundation for future plans and goals, which will be of great importance to you. face the real facts in order to bring improvement in your financial situation. During this time you may want to buy a new car or travel—just to avoid boredom. It's also very important to balance your business drive with volunteering your services and taking the time to join worthwhile organizations. This will bring you much satisfaction in the long run. This branching out into business and charitable affairs will give you a greater sense of freedom and accomplishment and undoubtedly will be a very satisfying year for you.

Your #9 Personal Year

The #9 Personal Year is for completion and endings that come before the beginning of a new nine-year cycle. This is the time to move on from relationships or things that no longer work. This can be a very difficult year, particularly if you do not like change. Completion brings with it the chance for new opportunities and interests in life for the coming cycle, which can be full of changes with abundant energy. It is the time to let go of old attitudes and habits to make room for the new. Try to assume an impersonal attitude toward the changes and challenges of this year. Many decisions will have to be made. Try not to work too hard and take good care of your health, for you have much to do in the coming year. Be social and communicative, and enjoy music and other arts. Your creativity is higher than usual during this year.
